

From the Principal's Window

Miki Hyogo-Prefectural Senior High School

Principal, Tetsuo Maeda

No.2 2017, June 21

Two and a half months have passed since the new school year started. Since taking up my new post as Principal, I am now living a busy life, and I have come to have stronger affection for Miki SHS. I am now an enthusiastic fan of this school as well as of my post as Principal. This time, I would like to explain the attractive points of Miki SHS.

Attractive Point 1

The first point is the wonderful educational facilities of this school. The school grounds are huge, and the track has covered bleachers. We also have seven tennis courts and lots of beautiful greenery in our school garden. I am sure that our students are very lucky to study at a school with such nice facilities.

Attractive Point 2

The second point is the characteristic points of global education that we have long fostered throughout our school history. Specifically, our school was designated as a Super English Language High School by the Ministry of Education, and we have a long history of international students' exchange with Wanaroo High School in Australia. Our school is also supported by the International Exchange Promotion Association financially and in many other practical ways.

Attractive Point 3

The third point is our students. They sincerely listen to other people's advice, express their own opinions clearly, and try to do their best with the resources they have. It is very difficult to explain these things with words, but please come to my school and talk to the students. I am sure you will understand what I mean.

The other day, our school's festival, "Fujo-Sai" was held, and our students presented themselves to the guests and to the community. From now on, they will go out of school, and join various community activities. Please expect big things!
